

Safety Data Sheet

Advanced Nutrients Bud Ignitor

Section 1. Identification

GHS product identifier	: Advanced Nutrients Bud Ignitor
Other means of identification	: Product Code: 2360 Formula Code: 002A
Recommended use of the chemical and restriction on use	: A plant nutrient used to obtain faster growth and larger yields in all kinds of growing media. Not to be used as food or feed in any forms.
Supplier/Manufacturer's details	: Advanced Nutrients Ltd. 109-31063 Wheel Ave. Abbotsford, BC Canada V2T6H1 Tel: (877) 604-8637 Email: info@advancednutrients.com www.advancednutrients.com
Emergency Phone number	: 24 Hour Transportation Emergency Number – CHEMTREC 1-800-424-9300 U.S.A, Canada, International

Section 2. Hazard Identification

GHS classification of the substance/mixture	: Neither the mixture nor its major constituents are listed in (a) the CLP/GHS database (Table 3.1 and 3.2 of Annex VI to CLP) and (b) OSHA Laws & Regulations (29 CFR - 1910 Subpart Z: Table Z-1 to Z-3) as hazardous materials.
GHS label elements	
Pictogram symbol	: Not applicable.
Signal word	: Not applicable.
Hazard statement	: No known significant effects or critical hazards.
Precautionary statement	
General	: Read label before use. Keep out of reach of children. If medical advice is needed, have product container/label at hand.
Prevention	: Wash hands thoroughly after handling. Do not eat, drink or smoke when using this product.
Response	: If skin or eye irritation occurs get medical advice/attention. If in eyes: rinse cautiously with water for several minutes.
Storage	: Store in cool and dry place.
Disposal	: Dispose of contents and container in accordance with local,

Other hazards (not covered the GHS)	: regional, national and international regulations. Potassium nitrate is used in the manufacture of this product. The US National Fire Protection Association (NFPA) Code 430 (1995) has classified Potassium nitrate as oxidizing material in Class 1, which slightly increase the burning rate of combustible materials, but do not cause spontaneous ignition when it comes in contact with them.
--	---

Section 3. Composition/Information on Ingredients

Substance/Mixture	: Mixture
Chemical identity	: Not applicable
Common name/synonym	: Not available
CAS number and other unique identifiers	: Not applicable
Impurities and stabilizing additives	: Not applicable

Ingredient name	CAS number	% (w/w)	Classification according to OSHA Law and Regulations
Potassium Nitrate	7757-79-1	3-6	Not classified as hazardous.

The chemical identity of the remaining ingredients and their exact proportions used in the mixture are a proprietary trade secret (protected by the Confidential Business Information – CBI) and, within the current knowledge of the manufacturer and in the concentration applicable, they are not hazardous to health or the environment.

Section 4. First-aid Measures

Description of necessary measures	
Self-protection of first-aiders	: No special protection is required.
General information	: Remove contaminated clothing immediately. In case of accident or unwellness, seek medical attention immediately.
Inhalation	: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.
Skin contact	: Flush contaminated skin with plenty of water. Get medical attention if symptoms occur.
Eye contact	: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.
Ingestion	: Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is

	conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.
Most important symptoms/effects, acute and delayed:	
Inhalation	: May cause respiratory irritation. Exposure to decomposition products may cause a health hazard. Serious effects may be delayed following exposure.
Skin contact	: No known significant effects or critical hazards.
Eye contact	: If in eyes, it causes eye irritation.
Ingestion	: May be harmful if swallowed.
Indication of immediate medical attention and special treatment needed:	
Notes to physician	: Treat symptomatically.
Specific treatments	: No specific treatment.
See also toxicological information (Section 11).	

Section 5. Fire-fighting Methods

Suitable extinguishing media	: Use an extinguishing agent suitable for the surrounding fire.
Unsuitable extinguishing media	: None known
Specific hazards arising from the chemical	: No specific fire or explosion hazard. Decomposition products may include the following materials: nitrogen oxides phosphorus oxides metal oxide/oxides
Special protective equipment for fire-fighters	: Firefighters may enter the area if a self-contained breathing apparatus (SCBA) and a full face piece is worn.
Special protective precautions for fire-fighters	: No special protection is required.

Section 6. Accidental Release Measures

Personal precautions, protective equipment and emergency procedures	
For non-emergency personnel	: Put on appropriate personal protective equipment.
For emergency personnel	: If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
Environmental precautions	: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods and materials for containment and clean up

- Small spill** : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Do not absorb in sawdust or other combustible material. It may lead to a fire risk when it dries out. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose via a licensed waste disposal contractor.
- Large spill** : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Do not absorb in sawdust or other combustible material. It may lead to a fire risk when it dries out. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product.

Section 7. Handling and Storage

Precautions for safe handling

- Advice on general hygiene** : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
- Protective measures** : Put on appropriate personal protective equipment (see Section 8).
- Conditions for safe storage and any incompatibilities** : Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

Section 8. Exposure Controls/Personal Protection

Control parameters

- | | | |
|--|---|---|
| Occupational exposure limits | : | Not applicable according to OSHA's mandatory PELs in the Z-Tables. |
| Biological limit values | : | None |
| Appropriate engineering controls | : | No special ventilation requirements. Good general ventilation should be sufficient to control worker exposure to airborne contaminants. |
| Environmental exposure controls | : | Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. |
| Individual protection measures | | |
| Hygiene measures | : | Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Ensure that eyewash stations and safety showers are close to the workstation location. |
| Personal Protective Equipment (PPE) | : | PPE should be used in conjunction with other control measures, including engineering controls, ventilation and isolation. See Section 5 (Fire-fighting measures) of the SDS for specific fire/chemical PPE advice. |
| Eye/face protection | : | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. |
| Skin protection | : | Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. |
| Respiratory protection | : | Not required under normal conditions of use. |
| Thermal hazards | : | None |

Section 9. Physical and Chemical Properties

- | | | |
|------------------------------------|---|-----------------------------|
| Appearance (physical state) | : | Dark brown, opaque, liquid. |
|------------------------------------|---|-----------------------------|

Odor	: Seaweed
Odor threshold	: Not available
pH	: 5.6
Melting point/Freezing point	: -3°C (26.6°F)
Initial boiling point and boiling range	: 100°C (212°F)
Flash point	: Not applicable
Evaporation rate	: Not available
Flammability (solid, gas)	: Not flammable
Upper/lower flammability or explosive limits	: Not applicable
Vapor pressure	: Not available
Vapor density	: Not available
Relative density	: 1.06 g/ml
Solubility (ies)	: Miscible in water
Partition coefficient: n-octanol/water	: Not available
Auto-ignition temperature	: Not applicable
Decomposition temperature	: Not available
Viscosity	: Not available

Section 10. Stability and Reactivity

Reactivity	: No specific test data related to reactivity available for this product or its ingredients.
Chemical stability	: The product is stable.
Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.
Conditions to avoid	: Keep from freezing. Avoid contact with skin, eyes or ingestion.
Incompatible materials	: Reactive or incompatible with the following materials: oxidizing materials and acids.
Hazardous decomposition products	: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Section 11. Toxicological Information

Acute toxicity				
Ingredient	Toxicity	Species	Dose*	Remark
Potassium Nitrate	Oral LD50 Inhalation LC50 Dermal LD50	Rat	>2000 mg/kg bw	Harmful if swallowed
Skin corrosion/irritation	:	Not-irritating to the skin.		
Serious eye damage/irritation	:	Non-irritant.		
Respiratory or skin sensitization	:	Non skin sanitizer.		
Germ cell mutagenicity	:	There is no data available.		
Carcinogenicity	:	There is no data available.		
Reproductive toxicity	:	No adverse effect.		
STOT-single exposure	:	There is no data available.		
STOT-repeated exposure	:	There is no data available.		
Aspiration hazard	:	There is no data available.		
The Likely routes of exposure, health effects and Symptoms related to the physical, chemical and toxicological characteristics				
Eye contact	:	No known significant effects or critical hazards.		
Inhalation	:	No known significant effects or critical hazards.		
Skin contact	:	No known significant effects or critical hazards.		
Ingestion	:	May be harmful if swallowed.		
Delayed and immediate effects and also chronic effects from short or long term exposure				
Short-term exposure				
Potential immediate effects	:	No known significant effects or critical hazards.		
Potential delayed effects	:	No known significant effects or critical hazards.		
Long-term exposure				
Potential immediate effects	:	No known significant effects or critical hazards.		
Potential delayed effects	:	No known significant effects or critical hazards.		
Potential Chronic health effect	:	No known significant effects or critical hazards.		
Numerical measures of toxicity				
Acute toxicity estimate				
Oral	:	There is no data available.		
Inhalation of vapors	:	There is no data available.		

Section 12. Ecological Information

Toxicity

Ingredient name	Result*	Species	Exposure	Reference
-----------------	---------	---------	----------	-----------

There is no data available.

Persistence and degradability	:	There is no data available.		
Bio accumulative potential	:	There is no data available.		
Mobility in soil	:	There is no data available.		
Other adverse effects	:	No known significant effects or critical hazards.		

Section 13. Disposal Considerations

Disposal of waste methods	:	The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling empty containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
Contaminated packaging	:	Empty containers should be recycled or disposed of through an approved waste management facility. Persons conducting disposal, recycling or reclamation activities should follow the information in Section 8 of this SDS.

Section 14. Transport Information

Identification of ingredients according to UN Model Regulations

UN number	This product is a mixture of ingredients which are not listed as 'Dangerous Goods' in Chapter 3.2 of UN Recommendations on the Transport of Dangerous Goods and/or one or more ingredients are included in the list but their mixture is exempted from the same Regulation based on the Articles 2.0.2.5 (C), 2.0.2.7 and 3.3.1 No. 208.
UN proper shipping name	
Transport hazard class(es)	
Packing group	

Special precaution for user	Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.
Transport in bulk	Not applicable (\leq 1000L-container).

Environmental hazards

Ingredient's name	IMDG	UN	ADR	RID	ADN
Potassium Nitrate	No	No	No	No	No

Section 15. Regulatory Information

Safety, health and environmental regulations specific for the product in question	:	Not known.
--	---	------------

Section 16. Other Information

Prepared by	:	Department of Product Development, Advanced Nutrients Ltd., Canada
Date of preparation (d/m/y)	:	27/04/2015
